Sound and Design

Audio solutions

Perfect audio add-on solution for flat panels and video walls. Design audio solutions to integrate speakers visually less obtrusive in public areas.

Audipack®

It's great to have solutions...

Professional audio solutions

Wall mounted soundbar with 84" screen

The perfect audio add-on for any screen of any size videowall

Finding a fitting solution like this is normally quite a quest to find, but Audipack manufactures custom built soundbars and audio solutions to fit any screen, presentation assembly or videowall.

The main advantage is that these speaker solutions are custom built for any application and provides mounting features to any Audipack related product. No need to install more components than needed and save time by simply combining products that match each other.

Soundbar solutions for any screen

For the soundbar products, a special production method is designed. It's possible to create a soundbar that, no matter the length, the sound quality remains the same. It is even possible to incorporate 3 audio channels in one soundbar (LCR).

The internal segmentation of the components makes it possible to integrate a small amplifier or 100 volt transformer and enable it to work as a stand-alone item. This can be done even when the speaker is already installed.

With it's modern anodized aluminium housing and black front it's simply a modern and welcome addition to the screen and audiovisual application. For installing the speaker systems Audipack has created all possible mounting solutions to trolley's, wall- and lift systems and rental floor stands.

Based on the same technology Audipack has developed special ceiling suspended and column mounted speaker systems.

The line array speakers are perfect for public applications and provides a professional sound that doesn't need to be supported by subwoofers.

Optional

- ▲ **Wall mounts**
- ▲ **Ceiling mount**
- ▲ **Mounts to Audipack presentation systems**
- ▲ **Stereo mini amplifier**

(component only)

SOUNDBAR FOR FLAT PANELS

SOUNDBAR STEREO

Ref	LSS-XXXXSB
Dimensions in mm	W (screen) x D 143 x H 147
Max. power	2 x 30 Watt RMS at 8 Ohm

SOUNDBAR RING SOLUTIONS

NEW

Unique audio solutions for public areas and boardrooms

With the LSS-UFO, Audipack presents a new way to look at audio. The modern design of the UFO offers lots of possibilities for applications in public areas and boardrooms. The UFO is a ceiling suspended speaker with 4 internal audio elements. These elements radiate the sound in the direction of their own, so that a broad beam width is created in the area. The UFO is suspended from the ceiling by 4 stainless steel wires which are adjustable in length up to 4 meters.

The combination of the anodized aluminium construction with the black or white front, not only make it a delight to look at, but also to listen to.

In combination with modern lighting technique, the UFO is a perfect solution above a conference table, in a restaurant or luxury shop. By using multiple UFO's, you have stereo sound where ever you walk in de room. With the optional 100 Volt transformer, the UFO's are also usefull in 100 Volt installations.

AUDIO SOLUTIONS FOR COLUMN & CORNER INSTALLATIONS

NEW

Design sound solutions for public places

The LLS-Boomerang offers an elegant solution for placing speakers on columns and corners in public areas. With the Boomerang, the speakers are visually less obtrusive. This unique angled speaker can be mounted around the corner of a wall or to a square or round column. The Boomerang is a speaker unit with multiple driver system and has therefore a wide beam width.

With two Boomerang speakers, the entire column is surrounded and there is sound on all four sides, with the advantage that there are not four but only two systems are required. In addition, the Boomerang is custom available to the width of the column or diameter. With the optional 100 Volt transformer, the Boomerang's are also usefull in 100 Volt installations.

**Ref.****LSS-BOOMERANG**

Dimensions in mm

W 566 x H 566 x D 146

Max. power

2 x 30 Watt RMS at 8 Ohm
